

At **Tuatara Landscapes**, we believe it is possible to carry out our work with controls that prevent or reduce environmental impacts.

We are committed to:

- Protecting the environment through sustainable practices in landscape construction and maintenance activities;
- Preventing pollution across all outdoor space worksites and activities;
- Comply with ISO 14001:2015 and any legal obligations; and
- Work towards continuous improvement.

The objectives framework we will use to pursue this commitment is:

- Making every reasonable effort to protect the environment from adverse effects, and to minimise any impact that may arise from our landscape construction and maintenance services;
- Encouraging staff to protect the environment by applying approved procedures, participating in training, and sharing information on the safe storage, handling, use, and disposal of materials used in outdoor works;
- Carry out regular reviews of our processes to verify compliance with this policy;
- Provide information about any potential environmental hazards to relevant clients, authorities, employees, and other affected organisations; and
- Set measurable environmental objectives and targets, guided by our [Operational Objectives](#), which will be monitored regularly.

This policy is communicated throughout our organisation and displayed in visible locations. To support transparency, we will communicate this to all clients, contractors, regulatory bodies, and other interested parties as required
